9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.

No forecast or prospect statement has been previously disclosed to shareholders.

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

Current market conditions continue to be challenging and the industry as a whole is facing from high bean costs and weak market prices relative to bean costs. These negative headwinds mean cocoa processors will continue to struggle to make positive processing margins. Another negative factor contributing to the high bean costs is the Ebola outbreak risk in Ivory Coast and Ghana, the world's two largest cocoa bean producers. These two countries are close neighbours to the worst Ebola-hit countries, specifically Liberia, Sierra Leone and Guinea.

Notwithstanding these negative factors, the board and management believe that the cocoa processing industry is a vital and indispensable part of the overall cocoa/chocolate value chain and the long term outlook for worldwide cocoa and chocolate consumption remains bright. As such, we are confident of the Group's long term business prospect and we will continue to execute strategies to manage and mitigate risks arising from these challenges, while strengthening our competitive positioning by expanding sales channels in USA and Indonesia.
